

# 化学科講演会のお知らせ

講演題目：SF<sub>5</sub> Organic Chemistry: Innovating to  
Escape the PFAS Dilemma

講師：Dr. Dominique Cahard

(Normandie University, Rouen, France)

日時：5月15日（金）15時30分より

場所：南7号館7階セミナー室

Summary: The concept “ESCAPE from PFAS” touches on a major and timely issue in chemistry balancing the exceptional properties of fluorine-containing compounds with the urgent need for sustainability, especially in the face of growing regulatory and environmental pressures. This lecture focuses on advancing non-PFAS fluorinated molecules with a particular emphasis on SF<sub>5</sub> chemistry. The goal is to pioneer the next generation of high-value fluoroorganics by developing innovative synthetic methodologies enabling access to unprecedented SF<sub>5</sub> molecular assemblies.
